Sample Referral Letters

200 synthetic referrals for testing. All practices, patients and clinical details are fictional.

Referral #001

```
REFERRING PRACTICE: PRAC-BRK-635
PRIORITY: URGENT
PATIENT: TEST-299982

47-year-old woman with a swollen, hot, painful right calf for three days.
Long-haul flight last week. On combined pill. Wells score 3. D-dimer raised.
Started on apixaban treatment dose pending scan. Advised 999 for chest pain or
breathlessness.
```

Referral #002

```
REFERRING PRACTICE: PRAC-OAK-196
PRIORITY: ROUTINE
PATIENT: TEST-361032

Thank you for seeing this patient.
```

Referral #003

```
REFERRING PRACTICE: PRAC-HGT-251
PRIORITY: URGENT
PATIENT: TEST-541254

69-year-old man with unintentional weight loss of 8 kg over three months and new
change in bowel habit to looser stools. Iron-deficiency anaemia picked up on
routine bloods; no prior GI history. FIT result 142 ug Hb/g. Hb 98 g/L, ferritin
6. Abdominal exam unremarkable. Advised to attend ED with any rectal bleeding
causing dizziness or severe abdominal pain.

CLINICIAN NOTE: FIT positive above threshold.
```

Referral #004

```
REFERRING PRACTICE: PRAC-BRK-946
PRIORITY: ROUTINE
PATIENT: TEST-394405

52-year-old woman with gallstones on ultrasound and three episodes of biliary
colic in four months. One A&E attendance last month; discharged with analgesia.
LFTs normal between episodes. Ultrasound: multiple gallstones, CBD 5 mm. Advised
to attend ED if fever, jaundice or pain lasting over 6 hours.
```

Referral #005

```
REFERRING PRACTICE: PRAC-RVS-229
PRIORITY: URGENT
PATIENT: TEST-404718

67-year-old woman with three weeks of painless visible haematuria, two episodes.
Previous smoker, quit 2015. No prior urological history. Urine dip positive for
blood, MSU negative for infection. U&E normal, eGFR 74. Advised to attend ED if
unable to pass urine or passing clots.

CLINICIAN NOTE: Meets 2-week-wait criteria for suspected bladder cancer.
```

Referral #006

```
REFERRING PRACTICE: PRAC-MPL-314
PRIORITY: ROUTINE
PATIENT: TEST-159105

As per phone call.
```

Referral #007

```
REFERRING PRACTICE: PRAC-WLW-683
PRIORITY: URGENT
PATIENT: TEST-519838

Please assess and advise. Many thanks.
```

Referral #008

```
REFERRING PRACTICE: PRAC-OAK-678
PRIORITY: ROUTINE
PATIENT: TEST-430349

Please assess and advise. Many thanks.

CLINICIAN NOTE: Patient requests a female clinician where possible.
```

Referral #009

```
REFERRING PRACTICE: PRAC-CLV-921
PRIORITY: URGENT
PATIENT: TEST-415516

55-year-old woman with sudden painless loss of vision in the right eye this
morning, now partially recovered. Hypertension, type 2 diabetes, smoker. Visual
acuity 6/12 right, 6/6 left. ECG sinus rhythm. Started aspirin 300 mg. Advised 999
if any weakness, speech disturbance or further visual loss.

CLINICIAN NOTE: Possible amaurosis fugax - TIA pathway may be more appropriate if
not accepted.
```

Referral #010

```
REFERRING PRACTICE: PRAC-OAK-949
PRIORITY: ROUTINE
PATIENT: TEST-326015

69-year-old woman with a carpal tunnel picture: numbness of thumb, index and
middle fingers, waking at night. Hypothyroid on levothyroxine. Works on a
production line. Positive Phalen's and Tinel's. No thenar wasting. Steroid
injection declined. To return if weakness or wasting develops.
```

Referral #011

```
REFERRING PRACTICE: PRAC-OAK-217
PRIORITY: ROUTINE
PATIENT: TEST-757920

77-year-old man with recurrent tonsillitis: seven episodes in the past year
requiring antibiotics. Episodes documented in records for the past two years (5
and 6 per year). Currently well between episodes; tonsils grade 2. Advised to seek
urgent review if unable to swallow or one-sided throat swelling.
```

Referral #012

```
REFERRING PRACTICE: PRAC-BRK-150
PRIORITY: ROUTINE
PATIENT: TEST-336962

29-year-old man with gallstones on ultrasound and three episodes of biliary colic
in four months. Pain after fatty meals, lasting 2-3 hours. No jaundice. LFTs
normal between episodes. Ultrasound: multiple gallstones, CBD 5 mm. Advised to
attend ED if fever, jaundice or pain lasting over 6 hours.
```

Referral #013

```
REFERRING PRACTICE: PRAC-RVS-857
PRIORITY: URGENT
PATIENT: TEST-245262

52-year-old woman with sudden painless loss of vision in the right eye this
morning, now partially recovered. No previous eye problems. Takes no regular
medication. Visual acuity 6/12 right, 6/6 left. ECG sinus rhythm. Started aspirin
300 mg. Advised 999 if any weakness, speech disturbance or further visual loss.

CLINICIAN NOTE: Possible amaurosis fugax - TIA pathway may be more appropriate if
not accepted.
```

Referral #014

```
REFERRING PRACTICE: PRAC-OAK-729
PRIORITY: URGENT
PATIENT: TEST-942047

77-year-old woman with post-menopausal bleeding, two episodes over the past month.
Menopause age 51. Not on HRT. BMI 38. Speculum: cervix looks normal. Smear up to
date and normal. Told to expect contact within two weeks.
```

Referral #015

```
REFERRING PRACTICE: PRAC-BRK-872
PRIORITY: ROUTINE
PATIENT: TEST-828297

73-year-old woman with recurrent heartburn and regurgitation despite eight weeks
of full-dose omeprazole. Hiatus hernia suspected on previous barium swallow
(2019). FBC normal. Lifestyle advice given; trial of alginate added. Told to seek
review promptly if difficulty swallowing, vomiting blood or black stools.
```

Referral #016

```
REFERRING PRACTICE: PRAC-OAK-461
PATIENT: TEST-896431

84-year-old woman with recurrent tonsillitis: seven episodes in the past year
requiring antibiotics. Episodes documented in records for the past two years (5
and 6 per year). Currently well between episodes; tonsils grade 2. Advised to seek
urgent review if unable to swallow or one-sided throat swelling.
```

Referral #017

```
REFERRING PRACTICE: PRAC-WLW-517
PATIENT: TEST-217187

57-year-old woman with lower back pain radiating to the left leg for 14 weeks. Previous episode 5 years ago settled with physio. Straight leg raise positive at 40 degrees. Power and reflexes normal. No red flags. Cauda equina safety-netting given verbally and in writing.

CLINICIAN NOTE: Patient requests a female clinician where possible.
```

Referral #018

```
REFERRING PRACTICE: PRAC-OAK-261
PRIORITY: URGENT
PATIENT: TEST-970540

68-year-old woman with a persistent hoarse voice for four weeks. Current smoker, 20 per day. Drinks around 30 units a week. No neck lumps palpable. Chest X-ray requested, result awaited. Advised to call 999 if any noisy breathing or difficulty breathing.
```

Referral #019

```
REFERRING PRACTICE: PRAC-WLW-931
PRIORITY: URGENT
PATIENT: TEST-936783

60-year-old man with a two-week history of new daily headaches, worse on waking, with one episode of vomiting. No previous headache history. No head injury. Neurological exam: no focal deficit. Fundoscopy inconclusive (small pupils). BP 132/84. Advised to attend ED immediately if new weakness, confusion, or sudden severe headache.

CLINICIAN NOTE: Please consider same-week imaging.
```

Referral #020

```
REFERRING PRACTICE: PRAC-HGT-837
PRIORITY: ROUTINE
PATIENT: TEST-188079

76-year-old man with a two-year history of worsening bilateral knee pain, now limiting walking to 200 metres. Osteoarthritis on X-ray 2024. Regular paracetamol and topical NSAID with limited effect. Weight-bearing X-ray shows moderate medial compartment narrowing bilaterally. Advised to return if knee becomes hot, swollen or unable to weight-bear.
```

Referral #021

```
REFERRING PRACTICE: PRAC-WLW-603
PRIORITY: URGENT
PATIENT: TEST-200945

67-year-old man with a hard, painless left testicular swelling noticed three weeks
ago. No urinary symptoms. No previous scrotal problems. Examination: firm
irregular mass within the body of the testis, separate from epididymis. Patient
informed of suspected cancer referral.
```

Referral #022

```
REFERRING PRACTICE: PRAC-BRK-819
PRIORITY: ROUTINE

42-year-old woman with chronic plaque psoriasis covering roughly 15% of body
surface area. Psoriasis since teens; new joint pain in fingers over last 6 months.
Bloods: LFTs and FBC normal. Hep B/C and HIV screen negative. Advised to seek
same-day review if skin becomes widespread red and hot.

CLINICIAN NOTE: Query psoriatic arthritis; consider joint rheumatology/dermatology
clinic.
```

Referral #023

```
REFERRING PRACTICE: PRAC-CLV-331
PRIORITY: ROUTINE
PATIENT: TEST-832547

82-year-old man with lower urinary tract symptoms: frequency, nocturia x3 and poor
stream for a year. Started tamsulosin six months ago with partial benefit. No
haematuria. PSA 2.1 ng/mL. DRE: smooth, moderately enlarged, benign-feeling
prostate. Renal function normal. Advised to attend ED if unable to pass urine.
```

Referral #024

```
REFERRING PRACTICE: PRAC-BRK-767
PATIENT: TEST-536990

82-year-old woman with post-menopausal bleeding, two episodes over the past month.
On tamoxifen following breast cancer treatment in 2023. Speculum: cervix looks
normal. Smear up to date and normal. Told to expect contact within two weeks.
```

Referral #025

```
REFERRING PRACTICE: PRAC-RVS-843
PRIORITY: ROUTINE
PATIENT: TEST-232374

32-year-old man with lower urinary tract symptoms: frequency, nocturia x3 and poor stream for a year. Started tamsulosin six months ago with partial benefit. No haematuria. PSA 2.1 ng/mL. DRE: smooth, moderately enlarged, benign-feeling prostate. Renal function normal. Advised to attend ED if unable to pass urine.
```

Referral #026

```
REFERRING PRACTICE: PRAC-WLW-516
PRIORITY: URGENT
PATIENT: TEST-401742

32-year-old man with dysphagia to solids, progressive over six weeks, food sticking at mid-chest. Barrett's oesophagus diagnosed 2018, lost to surveillance follow-up. FBC shows mild microcytic anaemia, Hb 112. Advised to attend ED if unable to swallow fluids or saliva.
```

Referral #027

```
REFERRING PRACTICE: PRAC-OAK-851
PRIORITY: ROUTINE
PATIENT: TEST-430300

44-year-old man with a two-year history of difficulty concentrating, disorganisation and impulsivity, seeking ADHD assessment. Lost two jobs in the past year due to missed deadlines. ASRS screening questionnaire strongly positive. BP and pulse normal. No risk issues identified.
```

Referral #028

```
REFERRING PRACTICE: PRAC-RVS-884
PRIORITY: URGENT
PATIENT: TEST-531392

65-year-old woman with new-onset atrial fibrillation and symptomatic breathlessness on mild exertion. Hypertension, previous TIA in 2022. CHA2DS2-VASc 5. ECG confirms AF, rate 118. Started bisoprolol and apixaban. TFTs normal. Advised to call 999 for chest pain, collapse or worsening breathlessness.
```

Referral #029

```
REFERRING PRACTICE: PRAC-HGT-897

61-year-old man with a hard, painless left testicular swelling noticed three weeks ago. No trauma. Previous orchidopexy for undescended testis as a child. Examination: firm irregular mass within the body of the testis, separate from epididymis. Patient informed of suspected cancer referral.
```

Referral #030

```
REFERRING PRACTICE: PRAC-STN-569
PRIORITY: ROUTINE
PATIENT: TEST-722773

34-year-old woman with heavy menstrual bleeding for over a year, flooding and changing pads hourly on heavy days. Mirena coil removed last year due to side effects. Hb 104, ferritin 9 - started on ferrous sulphate. Pelvic ultrasound: 3 cm intramural fibroid. Advised to seek urgent help if bleeding very heavy with dizziness.
```

Referral #031

```
REFERRING PRACTICE: PRAC-MPL-660
PRIORITY: URGENT
PATIENT: TEST-484318

62-year-old woman with post-menopausal bleeding, two episodes over the past month. On tamoxifen following breast cancer treatment in 2023. Speculum: cervix looks normal. Smear up to date and normal. Told to expect contact within two weeks.

CLINICIAN NOTE: Patient requests a female clinician where possible.
```

Referral #032

```
REFERRING PRACTICE: PRAC-OAK-518
PRIORITY: URGENT
PATIENT: TEST-586504

Referred as discussed.
```

Referral #033

```
REFERRING PRACTICE: PRAC-HGT-991
PRIORITY: ROUTINE

48-year-old man with gallstones on ultrasound and three episodes of biliary colic in four months. Pain after fatty meals, lasting 2-3 hours. No jaundice. LFTs normal between episodes. Ultrasound: multiple gallstones, CBD 5 mm. Advised to attend ED if fever, jaundice or pain lasting over 6 hours.
```

Referral #034

```
REFERRING PRACTICE: PRAC-WLW-278
PRIORITY: ROUTINE
PATIENT: TEST-773447

29-year-old man with eight months of fatigue and low mood not responding to
sertraline 100 mg. Previous trial of citalopram ineffective. Engaged with talking
therapies, completed course. Bloods including TFTs, B12 and ferritin normal. PHQ-9
18. Crisis line number given; advised to contact 111 option 2 or attend ED if
thoughts of self-harm.
```

Referral #035

```
REFERRING PRACTICE: PRAC-CLV-324
PRIORITY: ROUTINE
PATIENT: TEST-943627

67-year-old man with a carpal tunnel picture: numbness of thumb, index and middle
fingers, waking at night. Hypothyroid on levothyroxine. Works on a production
line. Positive Phalen's and Tinel's. No thenar wasting. Steroid injection
declined. To return if weakness or wasting develops.
```

Referral #036

```
REFERRING PRACTICE: PRAC-RVS-349
PRIORITY: URGENT
PATIENT: TEST-374731

46-year-old man with a neck lump present for five weeks, slowly enlarging. Smoker;
recent dental treatment but lump predates this. 3 cm firm, non-tender level II
lymph node on the right. FBC and CRP normal. Patient aware of urgent suspected
cancer referral.
```

Referral #037

```
REFERRING PRACTICE: PRAC-OAK-966
PRIORITY: URGENT
PATIENT: TEST-530191

48-year-old man with three weeks of painless visible haematuria, two episodes.
Ex-smoker, 30 pack-years. Hypertension on amlodipine. Urine dip positive for
blood, MSU negative for infection. U&E normal, eGFR 74. Advised to attend ED if
unable to pass urine or passing clots.
```

Referral #038

```
REFERRING PRACTICE: PRAC-STN-706
PRIORITY: URGENT
PATIENT: TEST-585823

44-year-old woman with a swollen, hot, painful right calf for three days. Recent
knee arthroscopy two weeks ago. Wells score 3. D-dimer raised. Started on apixaban
treatment dose pending scan. Advised 999 for chest pain or breathlessness.
```

Referral #039

```
REFERRING PRACTICE: PRAC-WLW-192
PATIENT: TEST-594234

28-year-old woman with a new breast lump noticed four weeks ago, right upper outer
quadrant. No family history of breast or ovarian cancer. Post-menopausal, not on
HRT. Examination: 2 cm firm, non-tender, mobile lump. No axillary lymphadenopathy
palpable. Patient aware this is a suspected cancer referral and to expect contact
within two weeks.

CLINICIAN NOTE: Patient very anxious; please contact by phone rather than letter.
```

Referral #040

```
REFERRING PRACTICE: PRAC-STN-548
PRIORITY: URGENT
PATIENT: TEST-637913

71-year-old woman with a swollen, hot, painful right calf for three days. Recent
knee arthroscopy two weeks ago. Wells score 3. D-dimer raised. Started on apixaban
treatment dose pending scan. Advised 999 for chest pain or breathlessness.
```

Referral #041

```
REFERRING PRACTICE: PRAC-HGT-831
PRIORITY: ROUTINE
PATIENT: TEST-884862

65-year-old woman with a two-year history of difficulty concentrating,
disorganisation and impulsivity, seeking ADHD assessment. School reports describe
similar difficulties. No substance misuse. ASRS screening questionnaire strongly
positive. BP and pulse normal. No risk issues identified.

CLINICIAN NOTE: Patient requests a female clinician where possible.
```

Referral #042

```
REFERRING PRACTICE: PRAC-RVS-759
PRIORITY: URGENT
PATIENT: TEST-348638

71-year-old woman with new-onset atrial fibrillation and symptomatic
breathlessness on mild exertion. No previous cardiac history. Drinks heavily at
weekends. ECG confirms AF, rate 118. Started bisoprolol and apixaban. TFTs normal.
Advised to call 999 for chest pain, collapse or worsening breathlessness.
```

Referral #043

```
REFERRING PRACTICE: PRAC-BRK-923
PRIORITY: URGENT
PATIENT: TEST-546208

50-year-old man with dysphagia to solids, progressive over six weeks, food
sticking at mid-chest. Long-standing reflux. Lost 4 kg. FBC shows mild microcytic
anaemia, Hb 112. Advised to attend ED if unable to swallow fluids or saliva.
```

Referral #044

```
REFERRING PRACTICE: PRAC-RVS-146
PRIORITY: URGENT
PATIENT: TEST-248038

Thank you for seeing this patient.
```

Referral #045

```
REFERRING PRACTICE: PRAC-OAK-651

80-year-old woman with dysphagia to solids, progressive over six weeks, food
sticking at mid-chest. Long-standing reflux. Lost 4 kg. FBC shows mild microcytic
anaemia, Hb 112. Advised to attend ED if unable to swallow fluids or saliva.
```

Referral #046

```
REFERRING PRACTICE: PRAC-STN-371
PRIORITY: ROUTINE
PATIENT: TEST-334138

29-year-old woman with chronic plaque psoriasis covering roughly 15% of body
surface area. Psoriasis since teens; new joint pain in fingers over last 6 months.
Bloods: LFTs and FBC normal. Hep B/C and HIV screen negative. Advised to seek
same-day review if skin becomes widespread red and hot.

CLINICIAN NOTE: Patient requests a female clinician where possible.
```

Referral #047

```
REFERRING PRACTICE: PRAC-RVS-664
PRIORITY: ROUTINE
PATIENT: TEST-214569

30-year-old man with a two-year history of difficulty concentrating,
disorganisation and impulsivity, seeking ADHD assessment. Lost two jobs in the
past year due to missed deadlines. ASRS screening questionnaire strongly positive.
BP and pulse normal. No risk issues identified.
```

Referral #048

```
REFERRING PRACTICE: PRAC-BRK-476
PRIORITY: ROUTINE

55-year-old woman with lower back pain radiating to the left leg for 14 weeks.
Previous episode 5 years ago settled with physio. Straight leg raise positive at
40 degrees. Power and reflexes normal. No red flags. Cauda equina safety-netting
given verbally and in writing.
```

Referral #049

```
REFERRING PRACTICE: PRAC-BRK-864
PRIORITY: ROUTINE
PATIENT: TEST-716215

43-year-old man with suspected obstructive sleep apnoea: loud snoring, witnessed
apnoeas and daytime sleepiness. BMI 36. HGV driver - advised about DVLA
obligations. STOP-BANG 6. Thyroid function normal. Advised not to drive if feeling
sleepy.

CLINICIAN NOTE: Occupational driver; would appreciate expedited assessment.
```

Referral #050

```
REFERRING PRACTICE: PRAC-WLW-392
PRIORITY: ROUTINE
PATIENT: TEST-335760

40-year-old woman with a carpal tunnel picture: numbness of thumb, index and
middle fingers, waking at night. Hypothyroid on levothyroxine. Works on a
production line. Positive Phalen's and Tinel's. No thenar wasting. Steroid
injection declined. To return if weakness or wasting develops.
```

Referral #051

```
REFERRING PRACTICE: PRAC-HGT-235
PATIENT: TEST-732608

61-year-old woman with sudden painless loss of vision in the right eye this
morning, now partially recovered. No previous eye problems. Takes no regular
medication. Visual acuity 6/12 right, 6/6 left. ECG sinus rhythm. Started aspirin
300 mg. Advised 999 if any weakness, speech disturbance or further visual loss.

CLINICIAN NOTE: Possible amaurosis fugax - TIA pathway may be more appropriate if
not accepted.
```

Referral #052

```
REFERRING PRACTICE: PRAC-OAK-656
PRIORITY: URGENT
PATIENT: TEST-368159

57-year-old man with a pigmented lesion on the back that has changed shape and
bled over the last two months. Previous BCC excised from nose in 2021. Dermoscopy:
asymmetric, irregular border, multiple colours, 9 mm. 7-point checklist score 5.
Patient informed of suspected cancer pathway.

CLINICIAN NOTE: Photographs attached to the e-RS referral.
```

Referral #053

```
REFERRING PRACTICE: PRAC-CLV-686
PRIORITY: ROUTINE
PATIENT: TEST-296022

Kindly review.
```

Referral #054

```
REFERRING PRACTICE: PRAC-CLV-698
PRIORITY: ROUTINE
PATIENT: TEST-481977

Please see.
```

Referral #055

```
REFERRING PRACTICE: PRAC-WLW-783
PRIORITY: ROUTINE

68-year-old man with gallstones on ultrasound and three episodes of biliary colic
in four months. Pain after fatty meals, lasting 2-3 hours. No jaundice. LFTs
normal between episodes. Ultrasound: multiple gallstones, CBD 5 mm. Advised to
attend ED if fever, jaundice or pain lasting over 6 hours.
```

Referral #056

```
REFERRING PRACTICE: PRAC-HGT-666
PRIORITY: ROUTINE
PATIENT: TEST-225761

83-year-old man with gallstones on ultrasound and three episodes of biliary colic
in four months. Pain after fatty meals, lasting 2-3 hours. No jaundice. LFTs
normal between episodes. Ultrasound: multiple gallstones, CBD 5 mm. Advised to
attend ED if fever, jaundice or pain lasting over 6 hours.
```

Referral #057

```
REFERRING PRACTICE: PRAC-MPL-912
PRIORITY: URGENT
PATIENT: TEST-304176

44-year-old woman with a two-week history of new daily headaches, worse on waking,
with one episode of vomiting. Known migraine but describes these as different in
character. Neurological exam: no focal deficit. Fundoscopy inconclusive (small
pupils). BP 132/84. Advised to attend ED immediately if new weakness, confusion,
or sudden severe headache.

CLINICIAN NOTE: Please consider same-week imaging.
```

Referral #058

```
REFERRING PRACTICE: PRAC-STN-363
PRIORITY: ROUTINE
PATIENT: TEST-901609

82-year-old woman with gradually worsening hearing in the left ear over a year,
with intermittent tinnitus. No vertigo or ear discharge. No previous ear surgery.
Otoscopy normal both sides. Rinne positive bilaterally, Weber lateralises to the
right. To return urgently if sudden further loss of hearing or facial weakness.

CLINICIAN NOTE: Asymmetric loss; please consider MRI IAMs.
```

Referral #059

```
REFERRING PRACTICE: PRAC-STN-643
PRIORITY: URGENT
PATIENT: TEST-110832

81-year-old man with three weeks of painless visible haematuria, two episodes. Ex-smoker, 30 pack-years. Hypertension on amlodipine. Urine dip positive for blood, MSU negative for infection. U&E normal, eGFR 74. Advised to attend ED if unable to pass urine or passing clots.
```

Referral #060

```
REFERRING PRACTICE: PRAC-STN-677
PRIORITY: URGENT
PATIENT: TEST-881589

75-year-old woman with dysphagia to solids, progressive over six weeks, food sticking at mid-chest. Barrett's oesophagus diagnosed 2018, lost to surveillance follow-up. FBC shows mild microcytic anaemia, Hb 112. Advised to attend ED if unable to swallow fluids or saliva.
```

Referral #061

```
REFERRING PRACTICE: PRAC-OAK-519
PRIORITY: ROUTINE
PATIENT: TEST-682754

82-year-old woman with recurrent heartburn and regurgitation despite eight weeks of full-dose omeprazole. Hiatus hernia suspected on previous barium swallow (2019). FBC normal. Lifestyle advice given; trial of alginate added. Told to seek review promptly if difficulty swallowing, vomiting blood or black stools.
```

Referral #062

```
REFERRING PRACTICE: PRAC-OAK-366
PRIORITY: ROUTINE
PATIENT: TEST-193841

77-year-old woman with heavy menstrual bleeding for over a year, flooding and changing pads hourly on heavy days. Mirena coil removed last year due to side effects. Hb 104, ferritin 9 - started on ferrous sulphate. Pelvic ultrasound: 3 cm intramural fibroid. Advised to seek urgent help if bleeding very heavy with dizziness.
```

Referral #063

```
REFERRING PRACTICE: PRAC-STN-982
PRIORITY: URGENT
PATIENT: TEST-251711

84-year-old woman with persistent cough for six weeks and two episodes of
haemoptysis. Smoker, 40 pack-years. COPD. Chest X-ray: 3 cm right upper lobe
opacity. Bloods normal. Advised to attend ED if coughing large volumes of blood.
```

Referral #064

```
REFERRING PRACTICE: PRAC-RVS-360
PRIORITY: ROUTINE
PATIENT: TEST-950390

31-year-old man with eight months of fatigue and low mood not responding to
sertraline 100 mg. Second episode of depression. No current suicidal ideation;
protective factors include children. Bloods including TFTs, B12 and ferritin
normal. PHQ-9 18. Crisis line number given; advised to contact 111 option 2 or
attend ED if thoughts of self-harm.
```

Referral #065

```
REFERRING PRACTICE: PRAC-CLV-484
PRIORITY: ROUTINE
PATIENT: TEST-633001

53-year-old woman with gallstones on ultrasound and three episodes of biliary
colic in four months. One A&E attendance last month; discharged with analgesia.
LFTs normal between episodes. Ultrasound: multiple gallstones, CBD 5 mm. Advised
to attend ED if fever, jaundice or pain lasting over 6 hours.

CLINICIAN NOTE: Patient requests a female clinician where possible.
```

Referral #066

```
REFERRING PRACTICE: PRAC-STN-511
PRIORITY: ROUTINE
PATIENT: TEST-599024

51-year-old woman with a carpal tunnel picture: numbness of thumb, index and
middle fingers, waking at night. Symptoms for 9 months. Night splints for 3 months
gave partial relief. Positive Phalen's and Tinel's. No thenar wasting. Steroid
injection declined. To return if weakness or wasting develops.
```

Referral #067

```
REFERRING PRACTICE: PRAC-MPL-456
PATIENT: TEST-722157

51-year-old woman with recurrent heartburn and regurgitation despite eight weeks
of full-dose omeprazole. No weight loss, dysphagia or anaemia. H. pylori stool
antigen negative. FBC normal. Lifestyle advice given; trial of alginate added.
Told to seek review promptly if difficulty swallowing, vomiting blood or black
stools.

CLINICIAN NOTE: Patient requests a female clinician where possible.

PRIORITY: ROUTINE
PATIENT: TEST-906533

79-year-old woman with poorly controlled asthma: two courses of oral steroids in
the last year. Adherent to ICS/LABA (inhaler technique checked). Eosinophils 0.6.
Peak flow 68% of predicted. Spirometry shows reversible obstruction. Personal
asthma action plan updated; advised 999 if not improving with reliever.
```

Referral #070

```
REFERRING PRACTICE: PRAC-BRK-821
PRIORITY: ROUTINE

79-year-old woman with a carpal tunnel picture: numbness of thumb, index and
middle fingers, waking at night. Symptoms for 9 months. Night splints for 3 months
gave partial relief. Positive Phalen's and Tinel's. No thenar wasting. Steroid
injection declined. To return if weakness or wasting develops.
```

Referral #071

```
REFERRING PRACTICE: PRAC-MPL-427
PRIORITY: ROUTINE
PATIENT: TEST-298239

69-year-old woman with lower back pain radiating to the left leg for 14 weeks.
Office worker. Completed physiotherapy; still struggling with sitting. Straight
leg raise positive at 40 degrees. Power and reflexes normal. No red flags. Cauda
equina safety-netting given verbally and in writing.
```

Referral #072

```
REFERRING PRACTICE: PRAC-RVS-611
PRIORITY: URGENT
PATIENT: TEST-205278

43-year-old man with dysphagia to solids, progressive over six weeks, food
sticking at mid-chest. Long-standing reflux. Lost 4 kg. FBC shows mild microcytic
anaemia, Hb 112. Advised to attend ED if unable to swallow fluids or saliva.
```

Referral #073

```
REFERRING PRACTICE: PRAC-OAK-207
PRIORITY: ROUTINE
PATIENT: TEST-555914

75-year-old woman with recurrent tonsillitis: seven episodes in the past year
requiring antibiotics. Missing significant time from work. No quinsy. Currently
well between episodes; tonsils grade 2. Advised to seek urgent review if unable to
swallow or one-sided throat swelling.
```

Referral #074

```
REFERRING PRACTICE: PRAC-BRK-397
PRIORITY: ROUTINE
PATIENT: TEST-469226

32-year-old woman with recurrent tonsillitis: seven episodes in the past year
requiring antibiotics. Missing significant time from work. No quinsy. Currently
well between episodes; tonsils grade 2. Advised to seek urgent review if unable to
swallow or one-sided throat swelling.

CLINICIAN NOTE: Patient requests a female clinician where possible.
```
